

LIST OF RECOGNISED TRAINING COURSES

July 2010 (Revision 36)

The following Training Courses have applied to and have been accepted by Hamilton Fraser Insurance as Recognised Training Courses. They meet the training standards acceptable to Hamilton Fraser Insurance and have insurance in place to cover practitioners whilst undergoing the training. Practitioners who provide a valid Training Certificate from these courses will be accepted for Medical Malpractice Insurance (subject to compliance with other underwriting criteria) for the aesthetic procedure under which the Training Course is listed. Insurance will not be provided for other listed procedures without the practitioner having attended and awarded a Training Certificate for that procedure.

Hamilton Fraser Insurance reserves the right to refuse Training Certificates from other training courses at their discretion.

Botulinum Toxin

Allows practitioner to purchase insurance for procedures using Vistabel, Botox or Dysport
